Delbin George

UI UX & Frontend Developer

ABOUT ME

I'm a front-end developer with a strong understanding of UI/UX principles and a passion for creating visually appealing and user-friendly web experiences. I love working with HTML, CSS, and JavaScript, and have a strong grasp of responsive design and mobile optimization.

PROJECTS

Eatables Food Discovery & Review Platform using HTML, Tailwind CSS and PHP

Final Year Project

- Independently conceptualized and designed a mobile app prototype for Eatables, a food discovery platform, using Figma.
- Implemented location-based search functionality to provide relevant food options and recommendations.
- Created a review and rating system, allowing users to read and share their experiences.
- Translated the wireframes into high-fidelity UI mockups using Figma.

Qikfixer: Repairmen Finder App

Personal Project

- Designed the user interface for a mobile app, focusing on user-centered design principles also created interactive prototypes in Figma to visualize the app's functionality and user flow.
- Implemented design changes that improved the app's usability and reduced user support requests.
- Analyzed competitive apps and user reviews to identify common usability issues and opportunities for improvement.

Developed personal portfolio website using React JS and Tailwind CSS

Personal Project

- Implemented clean and modern design elements, resulting in a 50% increase in website traffic and a 40% improvement in user engagement.
- Incorporated responsive design, ensuring that the website is optimized for viewing on various devices.
